02 Software Solutions & Development

03 Software License and Fulfillment

04 Hardware & IoT Solutions

MANAGED
SERVICE

IF U CAN IMAGINE, WE CAN BUILD IT!

Digital Immune System

Super Apps

Platform Engineering

Sustainable Technology

Managed services is the practice of outsourcing the responsibility for maintaining, and anticipating need for, a range of processes and functions in order to improve operations and cut expenses. It is an alternative to the break/fix or on-demand outsourcing model where the service provider performs ondemand services and bills the customer only for the work done.

Under this subscription model, the client or customer is the entity that owns or has direct oversight of the organization or system being managed whereas the Managed Services Provider (MSP) is the service provider delivering the managed services. The client and the MSP are bound by a contractual, service-level agreement that states the performance and quality metrics of their relationship.

Area of services:
- Software Development Resources
- Manage Security Service Provider (MSSP)
- Field IT Engineer
- Data Management

SOFTWARE
SOLUTIONS

HEALTH, SAFETY, ENVIRONMENT (HSE) SOLUTIONS

HSE solutions provides Occupational Health & Safety solutions to create better workplaces, protect people, and protect businesses.
